

YOGESH KUMAR

Rampur, Uttar Pradesh

+91-8865064674 yogeshkumar84192@gmail.com LinkedIn GitHub

Education

Teerthanker Mahaveer University, Moradabad

Bachelor of Computer Applications (BCA)

Aug 2023 – Present

CGPA – 7.77

Experience

Alfido Tech

Jul 2025 – Aug 2025

Data Analytics Intern

Remote

- Built 3+ interactive Power BI dashboards to help business teams easily understand their data and make faster decisions (reduced decision-making time by around 30%).
- Worked on cleaning and processing 100k+ rows of raw data by designing ETL pipelines, which reduced the need for repeated manual work each week by about 40%.
- Used Python (Pandas) to automate data validation tasks, helping improve data accuracy and reduce reporting errors (around 10% improvement).

Projects

Churn Intelligence System v3.0 | Python, FastAPI, Streamlit, XGBoost, SHAP | [GitHub](#)

April 2026

- Built a modular machine learning pipeline using XGBoost to analyse 300k+ customer records and identify key churn drivers, using SHAP for clear model explainability.
- Developed a FastAPI backend integrated with a Streamlit dashboard for real-time predictions, system monitoring, and interactive churn risk visualisation.
- Designed a Retention ROI Calculator to translate churn predictions into business impact, indicating potential revenue recovery based on model-driven insights.

Target Retail Data Analysis | SQL, PostgreSQL, Statistical Analysis | [GitHub](#)

Oct 2025

- Analysed 100k+ rows of retail data using SQL (JOINS and aggregations) to understand sales trends and identify useful business insights.
- Used basic statistical analysis to find patterns in supply chain delays, helping highlight factors that could reduce delivery issues (estimated improvement around 18%).
- Automated regular SQL reporting tasks, reducing manual effort by about 40% and saving time for more meaningful analysis work.

Uber Ride Data Analytics Dashboard | Power BI, DAX, Power Query | [GitHub](#)

Mar 2026

- Built a 7-page Power BI dashboard using 93K+ ride records and revenue data to give a clear overview of business performance in one place.
- Used DAX formulas to create dynamic KPIs and time-based insights, making it easier to track trends and support better decision-making (improved analysis efficiency by around 30%).
- Automated the data preparation process using Power Query, ensuring clean and consistent data from source to dashboard without manual effort.

Technical Skills

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Java, R, HTML

Machine Learning & AI: Scikit-learn, SHAP, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Hypothesis Testing

Databases: MySQL, PostgreSQL

Data Analytics & BI: Power BI (Advanced DAX, Power Query), Tableau, Advanced Excel (VLOOKUP, Pivot Tables), Data Modeling, ETL Pipelines

Tools & Version Control: Git, GitHub, VS Code

Soft Skills

- Analytical Thinking
- Team Collaboration
- Adaptability
- Problem Solving
- Clear Communication

Certifications & Achievements

- Big Data Computing – IIT Kanpur (NPTEL):** Distributed Systems & Hadoop Ecosystem Oct 2025
- Microsoft Power BI (Simplilearn):** Advanced DAX, Visualization & Power Query Dec 2025
- Deloitte Data Analytics (Forage):** Data Cleaning, Modeling & Communication Jun 2025
- Tata GenAI Powered Data Analytics (Forage):** Data Analytics & AI Strategy Jan 2025
- Advanced Excel (Simplilearn):** Pivot Tables, VLOOKUP & Statistical Functions Nov 2025
- Alfido Tech:** Certificate of Completion (Data Analytics) Aug 2025
